Bachelor's student in Computer Engineering with a passion for Web development.

EDUCATION

Bachelor in Computer Engineering

Tilottama

Lumbini Engineering College

May, 2021 - Present

As a Bachelor of Science in Computer Engineering student, my coursework focuses on the integration of hardware and software, providing a strong foundation in both computer science and electrical engineering. I've explored areas such as IoT, Web development.

PROJECTS

Bazar

Bazar – MERN Stack E-commerce Platform

Developed a feature-rich e-commerce platform using the MERN stack. Key features include user authentication, product listing, image uploads, location-based search, a real-time chat system and a responsive design. Utilized Leaflet.js for interactive location maps without API keys. Designed with a focus on scalability, user experience, and modern web development practices.

React with tailwind

A modern front-end project leveraging React.js and Tailwind CSS for a responsive, scalable, and aesthetically appealing UI. Focuses on performance, modular components, and best practices in modern web development.

<https://github.com/sunil2002k/reacttailwind>

Family Golf

A visually engaging website built with HTML, CSS, and GSAP, featuring smooth animations and interactive elements for an enhanced user experience. Focuses on modern web design principles, responsiveness, and performance optimization using GSAP for animations.
